## MYLOC MANAGED IT AG INTRODUCES ITSELF

Since 1999, myLoc managed IT AG has been operating data centers at its location in Düsseldorf and develops innovative hosting solutions that can be optimized for you according to your wishes. The location has eight carrier-neutral data centers with a combined area of 2,500 m<sup>2</sup>. In addition, myLoc owns the world's largest Lampertz Security Cell, which protects critical systems with sensitive data from major customers such as banks and insurance companies from external influences.

Even cluster and blade systems with high energy and cooling requirements can be operated without any problems on the well-developed areas of our data centers in Düsseldorf as well as in Munich. Our data center areas are ISO 27001 certified and are operated at Düsseldorf Rath, Düsseldorf Reisholz and Munich Haar, so that even geo-redundant, BaFin-compliant IT scenarios are also possible within our locations.

## COLOCATION

myloc managed IT offers individual racks starting from 1/8 rack up to a whole rack and more. We guarantee you good results in connectivity and data throughput with the help of cross-connects and dark fibre connectivity.

From the smallest rack to the cage, we offer the following services starting from the smallest possible size, the 1/8 rack:

- ▶ **Rack width from 600mm & depth 1000mm**
- ▶ **Power redundancy**
- ▶ **Power costs included**
- ▶ **Network port from 1 Gbit up to 100 Gbit**
- ▶ **1,000 MBit Traffic Flatrate**
- ▶ **1 Gbit to 100 Gbit connection possible**
- ▶ **Connection to 2,200 GBit backbone**
- ▶ **IP addresses - IPv4 / IPv6 included**
- ▶ **99.9% guaranteed network availability**
- ▶ **24/7 access possibility with own access key & fingerprint (two factor authorization)**
- ▶ **24/7 video surveillance and security service**
- ▶ **Redundant full air conditioning**

## PRIVATE CLOUD

We provide you with your own private cloud solution. We collaboratively analyze your requirements for your cloud environment and work with you to create the right solution for your IT infrastructure. We support and manage your cloud environment so that you can solely focus on your core business.

### Advantages

- ▶ Cloud solution out of myLoc's German data centers
- ▶ Guaranteed data security and high availability
- ▶ Highly qualified specialist personnel 24/7 for you on site

Carefree in the Cloud - Request now!

## CYBER SECURITY

In order to meet the ever-increasing demands of cyber security, myLoc managed IT AG offers a wide range of antivirus protection and cyberprotect solutions in cooperation with Kaspersky and Acronis.

Kaspersky Endpoint Security solutions are offered to match your infrastructure. The focus of the Kaspersky software is adaptive adjustability to new or unknown threats. With features such as „behavior detection“ and „machine learning“, the Kaspersky Endpoint solution is always one step ahead and can minimize update times. Bundle transparent costs, security and flexibility on one platform with the Kaspersky Endpoint solution.

With Acronis Cyber Protect Cloud, you can protect almost any device, whether it's servers, workstations or mobile work devices from attacks and data loss. Acronis Cyber Protect Cloud is all about ease of use and setting up protection plans for your devices. In addition, the plans are easily scalable and can be expanded with additional devices. A reporting system constantly notifies the administrator with messages called “Active Alerts” that provide an overview of possible cyber security incidents.

Sit down with us to fully protect your IT infrastructure with Kaspersky Endpoint Protection or Acronis Cyber Protect Cloud.
