PRIVATE CLOUD SOLUTION IN A GERMAN DATA CENTER

You don't want to move your infrastructure to the public cloud and are looking for a suitable alternative to AWS and Google Cloud? Then take a look at our Private Cloud solution. Your own Private Cloud with your own hardware in a data center in Germany.

Due to years of experience in the field of virtualization and provisioning of complex server infrastructures, we are pleased to present our own Private Cloud solution for your business. In cooperation with our longtime partner Virtuozzo we can provide you your own Virtual Infrastructure Platform. Our Virtual Infrastructure Platform product - VIP for short - is your own Private Cloud solution with the flexibility of a Public Cloud.

Virtuozzo

FLEXIBLE HOT & COLD STORAGE POOLS

VIRTUAL NETWORK

SINGLE MANAGEMENT CONSOLE

The product consists of a combination of suitable hardware and software for your cloud environment. We provide you with branded hardware from our partner Hewlett Packard Enterprise, install your Virtuozzo Virtual Infrastructure Platform and manage your cloud environment in our own ISO 27001 data centers.

Using the easy-to-understand web interface of our private cloud solutions, you can create and manage your own private cloud environment. You do not need to worry about the hardware of

your cloud, the qualified technicians of myLoc managed IT AG will take care of this for you.

myLoc'S VIP product offers an excellent data priority, which you can determine yourself. A special main feature of the VIP product is the use of „Hot and Cold Nodes“. These can be adjusted within the management structure to place important data with fast retrieval needs on a „Hot Node“ and distribute all others to „Cold Nodes“. This ensures a significantly lower delay during data call.

Hewlett Packard Enterprise

FIXED COSTS

Public Cloud can be very costly, as the low prices offered by many providers can increase the total monthly costs depending on use. In contrast to the public cloud, our VIP products allow you to calculate with fixed costs and still achieve maximum performance.

ONE PLATFORM

With Virtuozzo Infrastructure Platform, you get a management solution that allows you to manage your entire cloud infrastructure. In the blink of an eye, you have all parameters and instances mapped and can decide what changes to make.

TRUE PRIVATE CLOUD

We provide you with the complete infrastructure. In cooperation with us, we provide you with the required hardware for your cloud environment, install your own environment and are available for you around the clock.
