

## PRESS RELEASE

### **myLoc presents Cloud Backup Server - carry out backups even more effective now!**

**Düsseldorf, June 14, 2016.** Would you like to perform a backup of your server or workstation at any time? With the new backup products you can protect yourself from any kind of data loss in regards to your servers or workstations!

From now on you can benefit from the new Cloud Backup Server products and protect your server against data loss in the best possible way. The software solution from Acronis offers customers the possibility to secure their server infrastructure without worrying about storage space in the German ISO-certified data centres of myLoc managed IT AG. Users have access to up to 10,000 GB of storage per device for their data backup. The backup plans can be set up to be full, incrementally or differentially by the user, so that the user no longer has to worry about data loss.

We are very pleased that in cooperation with Acronis, a leading provider of backup solutions, we can launch this German cloud backup product on the German market and make it available in our German data centres," explains Christoph Herrnkind, board member of myLoc and responsible for the Cloud division.

With the new Cloud Backup Server products, customers have four preset products to choose from, which can be expanded individually at any time. myLoc offers customers a free trial period for cloud backup workstations and servers, so that interested parties can test the backup solutions without hesitation. Both the workstation backups and the server backups are hosted exclusively in the data centres of myLoc managed IT AG.

Connected to a German data centre, we offer the best quality in Germany. With our own 340 Gbit backbone and 24/7 on-site service, you can only benefit from an affordable German cloud. All your data remains in the myLoc data centre which is certified according to ISO 27001. Trust in the German Cloud technology and a German service provider, where security, quality and customer satisfaction are the main focus.
