

## PRESS RELEASE

### **Renewed ISO 27001 certification and a new data centre in Düsseldorf**

**Düsseldorf, 30th October 2018.** The IT market is in constant motion, development and new technologies are introduced every day. For this reason it is in the interest of both individuals and companies to keep up with the changes. Information security is one of those rapidly growing fields in the IT market that require additional attention and innovation. Securing data is a top priority for companies and private individuals, especially if the data contains sensitive material.

myLoc managed IT AG is continuously improving its services and support and has opened another data centre in Düsseldorf. At Gatherhof 44 in Düsseldorf a another data centre under the name DUS6 has been successfully built, which offers space for new colocation solutions for business customers. The new data centre in Düsseldorf enables customers to use a state-of-the-art colocation data centre with the necessary air conditioning, redundant UPS systems, access security as well as a very stable infrastructure and an extended backbone for all their connectivity needs. In total, the new data centre will accommodate 140 racks.

"We are very pleased that we were able to build a new data centre in Düsseldorf, thus laying the foundation for further growth with our existing and new customers. The new data centre will enable us to expand our high-availability colocation solutions quickly and efficiently," explains Christoph Herrnkind, CEO of myLoc managed IT AG.

This data centre is also certified according to ISO 27001, which was ensured by the audit process of the TÜV-IT experts of TÜV Saarland. Within the scope of the ISO certification, it was checked whether there were any security gaps in the system and in the human organisation. The certification was successfully carried out by TÜV Saarland for all myLoc managed IT AG data centres at the Düsseldorf location.

Interested parties can now receive individual colocation solutions in the new data centre in cooperation with the sales and technical departments of myLoc managed IT AG. For further information we are also available at [vertrieb@myloc.de](mailto:vertrieb@myloc.de) or under +49 (0) 211 - 61708020.
